

AMENDMENT TO THE CLAIMS

Please **CANCEL** claims 17-19 without prejudice or disclaimer.

Please **ADD** new claims 20-24, as follows.

The following is a complete list of all claims in this application.

1-19. (Cancelled)

20. (New) A liquid crystal display (LCD) having a transmissive region and a reflective region, the LCD comprising:

- a substrate;
- a thin film transistor (TFT) formed on the substrate and comprising a gate electrode, a source electrode and a drain electrode;
- a first pixel electrode formed of the same material and on the same plane with the gate electrode, the first pixel electrode comprising:
 - a transparent conductive layer; and
 - a non-oxidizing metal layer formed on the transparent conductive layer and having a first opening corresponding to the transmissive region;
- a passivation layer formed on the TFT and the first pixel electrode and having a contact hole exposing the source electrode and a second opening corresponding to the transmissive region; and

a second pixel electrode formed on the passivation layer and connected to the non-oxidizing metal layer and the source electrode via the second opening and the contact hole, respectively, the second opening having a third opening corresponding to the transmissive region.

21. (New) The LCD of claim 20, wherein the non-oxidizing metal layer comprises Cr or MoW.

22. (New) The LCD of claim 20, wherein the transparent conductive layer comprises indium tin oxide (ITO) or indium zinc oxide (IZO).

23. (New) The LCD of claim 20, wherein the passivation layer comprises a photosensitive transparent insulating material.

24. (New) The LCD of claim 23, wherein the passivation layer has embossment on a surface thereof.
